

TENNESSEE GENERAL ASSEMBLY
FISCAL REVIEW COMMITTEE

FISCAL NOTE

HB 1913 - SB 1895

February 22, 2018

SUMMARY OF BILL: Authorizes municipal natural gas utility systems located in Hardin and Fayette counties, to utilize revenues for the funding of chambers of commerce as well as economic and community organizations, as determined by the municipal legislative body.

ESTIMATED FISCAL IMPACT:

Other Fiscal Impact – Permissive decreases in local revenue available for funding current statutory obligations of municipal natural gas utility systems. To the extent any funding is allocated to a non-municipal organization, there will be a permissive decrease in local revenue within Hardin and Fayette County. The extent and timing of such impacts to Hardin and Fayette County cannot reasonably be determined.

Assumptions:

- Under current law, pursuant to Tenn. Code Ann. § 7-34-115, municipal utility systems are operated as self-sufficient entities and are required to devote all revenues to specific obligations of the municipal utility, repayment of municipal investments into the utility, or payment in lieu of ad valorem taxes to the municipality.
- The proposed language would authorize municipal natural gas utility systems within Hardin and Fayette counties to also devote revenues to funding chambers of commerce or other economic and community organizations, as determined by the municipal legislative body.
- To the extent municipal natural gas utility system within Hardin or Fayette County allocates revenue to a chamber of commerce or an economic and community organization there will be permissive decreases in local revenue available for funding current statutory obligations of municipal natural gas utility systems.
- To the extent a municipal natural gas utility system within Hardin or Fayette County allocates revenue to a chamber of commerce or an economic and community organization which is municipally operated, the result will be a permissive transfer of revenue from one municipal recipient to another. Any net impact to local revenue for such municipalities is considered not significant.
- To the extent a municipal natural gas utility system within Hardin or Fayette County allocates revenue to a chamber of commerce or an economic and community organization, which is not municipally operated, there will be a permissive decrease in

local revenue allocations which would otherwise be made to current utility or municipal obligations.

- Due to multiple unknown factors such as if a municipal natural gas utility system within Hardin or Fayette County will be authorized to allocate revenues to a non-municipal organization, the extent of any revenues allocated to such organizations, and the timing of any such allocations; a precise permissive decrease in local government revenue for cannot reasonably be determined.

IMPACT TO COMMERCE:

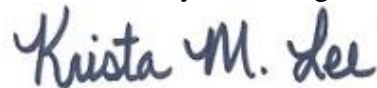

Other Fiscal Impact – Due to multiple unknown variables a precise impact to commerce and jobs in Tennessee cannot reasonably be determined.

Assumptions:

- To the extent a municipal natural gas utility system within Hardin or Fayette County is authorized to allocate revenues to a private business, there will be an equal and corresponding increase in private business revenue.
- Due to multiple unknown variables such as the extent of any revenues allocated to any private business, how any such monies will be utilized by private business and the timing of any business revenues and business expenditures, any impact to commerce and jobs in Tennessee cannot reasonably be determined.

CERTIFICATION:

The information contained herein is true and correct to the best of my knowledge.
